Background Checks

Paperless ordering and reporting
Go beyond the résumé and know exactly who you are hiring with paperless, integrated background checks. Our background feature supports more than 30 different background check service options available for order. The background status and information from the requested search can be viewed in your secure MyeScreen Inbox, displayed in the same fashion as drug test results. As with drug tests, eMail notification can be set up for completed background check orders.

Some companies cite the cost of performing a pre-employment check on every candidate as too costly. However the cost of re-hiring, re-training, and/or negligent hiring is actually more expensive than ordering a background check from the start. MyeScreen.com makes background checks easy by providing the option to order backgrounds together with drug tests, or providing sequentially.

MyeScreen.com is the management source for all pre-employment drug test and background check results, and helps employers hire the right person for the job.

The Random Generator

Non-discriminatory random testing
Generate a listing of your employees. Electronically select donors for random drug and alcohol testing pools. The MyeScreen Random Generator is used in conjunction with an Excel spreadsheet, formatted to upload your employee data into the MyeScreen.com random generator tool for selection.

The wizard-driven interface processes the information provided and randomly selects names to produce a display report for the employer to use to administer their random testing program. The selection can be exported into Excel format for ease of notification or use with other HRIS systems.

User Administration

Edit passwords, manage user privileges, control the activation of eMail notification and edit your eMail addresses with ease.

The Inbox - All the results you need on one screen

Your MyeScreen.com Inbox displays the status of a donor's drug test and background check results. Once a confirmed result is available, the donor result status is immediately updated and displayed for review. Receive, view and print confirmed test results and donor status all from your Inbox.

eMail Notification

You have a message from eScreen
eMail notification allows users to receive an eMail notice when there is a new result in their Inbox at MyeScreen.com. In the administration tool, users are able to activate or de-activate this function as desired. For security purposes, eMail notifications do NOT transmit test results or patient identifiable information via email.

Donor Event Scheduling

Coordinate a drug test at any eScreen Occupational Health Network (EOHN) clinic facility nationwide. Event scheduling creates an ePassport that provides all the necessary information regarding the clinic location, the donor and the scheduling information. The donor then proceeds, with the ePassport, to the clinic location for their drug test. This function allows donor to track missed events, time of collection, and donor status. The entire process is expedited via pre-authorization at the clinic.

Create a Variety of Reports

Manage your information efficiently
Retrieve data from the collection history file and manage information to process and produce various reports. This tool manages your entire drug testing program efficiently and electronically. The following reports are available to manage your hiring program.

Test Result Report Search and display final test dispositions. Provides a certificate for any confirmed test result.

Summary Report Select a specific date or date range and view the summary of the test results. This data can be exported and used in other applications, such as Excel.

Turnaround Time Report View test result turnaround time, from test completion to final results notice in the Inbox, on MyeScreen.com.

Statistics Report View drug screen statistics for all Non-DOT and DOT programs. This report shows statistics by analytes and by reason for test.

What is **MyeScreen**?

Online program
management
and result
reporting

eScreen develops, manufactures and markets employment screening products and software for hiring and maintaining efficient workforces.

Total **MyeScreen** hiring program management

Designed especially for Human Resource drug testing programs

MyeScreen is the paperless, web-based reporting platform that allows companies to access hiring data right from a PC 24 hours a day, seven days a week, via an Internet connection.

MyeScreen enables HR professionals to access drug test and background check results, create reports, track donor status, and manage a random donor testing pool.

MyeScreen allows employers to track the status of specimens, which eliminates time consuming calls to the clinics inquiring about status.

MyeScreen can retrieve, view, or print a record anytime from the archive, and generate report summaries regarding turnaround times, drug test statistics, or test summary reports.

MyeScreen ensures the confidentiality and integrity of all drug test result information. MyeScreen.com is a Thawte® Secure site utilizing user ID, password authentication and SSL encryption.

Receive hiring information on demand with our automated hiring program management application.

eScreen deploys proprietary technology to Occupational Health clinics nationwide. This technology creates an electronic, web-based preferred network for businesses seeking faster drug test results and paperless transactions.

eScreen currently processes millions of health-care and corporate data transactions per year through the eScreen Occupational Health Network (EOHN).
